

BIN BOMBS

Bin Odour SOLUTIONS!™

BIN BOMBS PTY LTD

Let's face it – garbage bins stink and attract flies and insects!

Most of them smell foul because of rotting refuse and still leave a stench after being emptied!

Industrial bins are even worse, especially when exposed to the hot sun.

Waste bins in and around parks, foreshores, shopping malls, hotels, caravan parks, restaurants, apartments, and the like can at times send out pungent odours repulsive to customers and pedestrian traffic - hardly positive Public Relations.

The Solution:

BIN BOMBS - a brand new, 100% natural product designed to absorb the vile stench of garbage and replace the smell with a pleasant aroma.

BIN BOMBS - are bio-degradable granules infused with a unique re-odorant and natural insect repellent. When sprinkled into rank-smelling garbage containers, **BIN BOMBS** quickly absorb the odours and changes the area in and around garbage bins to a fresher and more pleasant smelling environ.

After two years of trialling **BIN BOMBS** in many types of waste, people from all walks of life who utilise **BIN BOMBS** agree that it provides the ready-made solution that most businesses, councils and households have been desperately demanding! Following are some of the many areas enhanced with the long lasting and pleasant fragrance of **BIN BOMBS**:

- ✓ All Types of Refuse Bins
- ✓ Toilets
- ✓ Sanitary Bins
- ✓ Nappy Bins
- ✓ BBQ Areas
- ✓ Kitty Litter & Pet Areas
- ✓ Mining & Shipping
- ✓ Bad Odour

So, it should not surprise anyone that there are new uses still being discovered for the fantastically versatile, re-odorising **BIN BOMBS**!

The longevity of the **BIN BOMBS** fragrance far outlasts other products like sprays and chemical liquids.
