BIN BOMBS is a division of Un-Smell Industries

Why Bin Bombs?

The Problem:

Let's face it – garbage bins stink and attract flies and insects! This is true whether it be household wheelie bins or those waste bins belonging to the world's most reputable venues.

Most bin's smell foul because of rotting refuse and most are still “stinkers” after being emptied!

Industrial bins can be even worse, especially when exposed to the hot sun.

Waste bins in and around Parks, Foreshores, Shopping Malls, Hotels, Restaurants, and the like, can at times send out pungent odours repulsive to customers and pedestrian traffic – hardly a positive experience and definitely not good PR for the venue.

The Solution:

BIN BOMBS – a brand new product designed to replace the repulsive stench of garbage with a pleasant aroma.

BIN BOMBS – are bio-degradable granules infused with a unique re-odorant and natural insect repellent.

When poured into rank-smelling garbage containers, **BIN BOMBS** quickly change the area in and around garbage bins to a far more pleasing and agreeable environ.

After 18 months of trialling **BIN BOMBS** in all types of garbage, people from all walks of life who utilise **BIN BOMBS** agree it provides the readymade solution that most businesses and households have been desperately demanding!

Following are some of the many areas enhanced with the long lasting and pleasant fragrance of **BIN BOMBS**:

- All Types of Refuse Bins
- Toilet Rooms
- Sanitary Bins
- Nappy Bins
- Pet Areas
- Kitty Litter
- Fish Cleaning Spaces
- Closets
- Car Ashtrays
- Council Bins and Roll-aways and Waste Collection Trucks

So, it should not surprise anyone that new uses are still being discovered for the fantastically versatile, reodorising **BIN BOMBS**!

The longevity of the **BIN BOMBS** fragrance far outlasts other products like sprays and chemical liquids.
